

Matt Cox

Advanced practice clinician and marketing professional

Taylors, SC 29687

mattcox7777@gmail.com - 706-372-4822

My previous employment includes practicing nurse anesthesia, marketing and educational public speaking for specific healthcare models throughout the southeast, managing medical/renal floors in a large hospital setting, coordinating practice-specific contracts with insurance companies, hospital administrations, and private physicians as well as direct sales in healthcare. I also have experience with my own billing and CPT-9 coding. Clinically I began practice as a registered nurse in 1998 and a certified registered nurse anesthetist in 2002. I have over ten years of experience in surgery, emergency medicine, OB/GYN, pediatrics, geriatrics, and directing anesthesia services. I have always enjoyed a fast-paced and competitive environment. My experience has allowed me to become comfortable with high acuity and high stress situations. I enjoy interactions with physicians and nurses in these delicate situations. Again, I believe my experience and education provides me an advantage because I have a comprehensive understanding of the clinician and non-clinician aspects of healthcare.

My passion has always rested in helping people and providing quality healthcare. I have a strong work ethic and I believe in providing an example of integrity. I will be fully committed to a position if offered. I would love the opportunity for an interview to discuss this further. Thank you for your time.

PUBLICATIONS

Managing peri-operative anxiety in pediatric patients and families alike

May 5, 2002

Research design on the diagnosis and maintenance of minimizing anxiety with the pediatric surgical patient and their associated families. This project was accompanied by a video which details the entire surgical experience from the patient and family perspective starting the night before surgery to the point of being discharged home to normal activity. This project was funded by the University of North Carolina/Carolina's medical center nurse anesthesia program.
